INDEX TO SUBJECTS

A

Acetic acids: Disubstituted, nitrophenyl esters, and corresponding free acids, rotations (LEVENE, ROTHEN, and MEYER) 555

Adenosine: Fate, dog (CERECEDO and ALLEN) 421

Amino acids: α-, α-ketonic acids, reaction (HERBST and ENGEL) 505

Feeding, purified (CALDWELL and ROSE) 45, 57

(WOMACK and ROSE) 449

Stratum corneum, human keratins, comparison (WILKERSON) 377

Amino group: Free, peptides and proteins, allocation (GURIN and CLARKE) 395

Anemia: Casein, deaminized, production (HOGAN and RITCHIE) 179

Arachidonic acid: Butter fat (BOSWORTH and SISSON) 489

Chemistry (AULT and BROWN) 615

Determination (AULT and BROWN) 615

Arginase: Specificity (CALVERY and BLOCK) 155

Azochloramid: Sodium hypochlorite, chloramine-T, and, organic substrates, comparative action (GUITERAS and SCHMELKES) 235

B

Bacillus aertrycke: Citric acid decomposition (BRUCE) 119

Bacillus subtilis: Nuclease activity (MACFADYEN) 297

Bence-Jones: Protein, blood serum (KYDD) 747

Bile salts: Body fluids, determination by bile salt hemolysis (LICHTMAN) 717

Blood serum: Electrolyte balance, diet deficient in inorganic constituents, effect (SMITH and SMITH) 681

Electrolytes (SMITH and SMITH) 673

Lipoid-chlorine (PETERS and MAN) 23

Blood sugar: Decapitation and venesection, values, comparison (HRUBETZ and DOTTI) 731

Body composition: Diet poor in salts, effect (LIGHT, SMITH, SMITH, and ANDERSON) 689

Bombicysterol: (BERGMANN) 527

Butter fat: Arachidonic acid (BOSWORTH and SISSON) 489

C

Calcium: Retention, carbon dioxide effect (FORBES) 283

Calcium citrate: Ionization (HASTINGS, MCLEAN, EICHELBERGER, HALL, and DA COSTA) 351

XUM

Calcium ion: Concentration, determination, biological (McLEAN and HASTINGS) 337
Carbon dioxide: Calcium retention, effect (FORBES) 283
Phosphorus retention, effect (FORBES) 283
Carboxylic acids: α-Substituted, normal, rotatory dispersion curves (LEVENE and ROTHEN) 533
Carotene: Colostrum (SEMB, BAUMANN, and STEENBOCK) 697
Casein: Deaminized, anemia production (HOGAN and RITCHIE) 179
Fractions, amino acid inadequacy, supplement (CALDWELL and ROSE) 45
Catalase: (MARKS) 623
Cell: Respiration, reversible dyes, catalysis, mechanism (DEMEIO, KISSIN, and BARRON) 579
Cephalin: Electrometric titration (JUKES) 783
Chloramine-T: Sodium hypochlorite, azochloramid, and, organic substrates, comparative action (GUITERAS and SCHMELKES) 235
Chloride: Urine, glomerulus, frog and *Necturus* (WESTFALL, FINDLEY, and RICHARDS) 661
Chlorine: Lipoid-, blood serum (PETERS and MAN) 23
Cholesterol: Tissue, animal, deposition (OKEY, GILLUM, and YOKELA) 207
Citric acid: Decomposition by *Bacillus aertrycke* (BRUCE) 119
Cod liver oil: Antirachitic factor, tissue distribution (RUSSELL, TAYLOR, and WILCOX) 735
Colostrum: Carotene (SEMB, BAUMANN, and STEENBOCK) 697
Vitamin A (SEMB, BAUMANN, and STEENBOCK) 697
Copper: Dietary, tissue cytochrome and oxidase, relation (COHEN and ELVEHJEM) 97
Egg yolk, hemoglobin formation, influence (SHERMAN, ELVEHJEM, and HART) 289
Metabolism, chick embryo (McFARLANE and MILNE) 309
Coprosterol: Formation, sterol secretion and (SCHOENHEIMER and SPERRY) 1
Corn: Yellow, white zein preparation (MASON and PALMER) 131
Cystine: *d-*, acetyl and formyl derivatives, sulfur, oxidation, animal body (DU VIGNEAUD LORING, and CRAFT) 519
Dietary, tissue proteins, effect (LEE and LEWIS) 649
dl-, metabolism, growing dog, dietary protein, effect (STEKOL) 641
—, —, protein-free diet, effect (STEKOL) 225
l-, acetyl and formyl derivatives, sulfur, oxidation, animal body (DU VIGNEAUD, LORING, and CRAFT) 519

Cystine—*continued:*
l-, metabolism, growing dog, dietary protein, effect (STEKOL) 641
—, —, protein-free diet, effect (STEKOL) 225
Stereoisomers, solubility (LORING and DU VIGNEAUD) 267
Stone and hair, identity (LORING and DU VIGNEAUD) 267
Cytochrome: Tissue, dietary iron and copper, relation (COHEN and ELVEHJEM) 97

D

Dulcitan: Fate, animal body (CARR and KRANTZ) 371
Dulcitol: Fate, animal body (CARR and KRANTZ) 371
Dyes: Reversible, cellular respiration, catalysis, mechanism (DEMEIO, KISSIN, and BARRON) 579

E

Egg: Yolk, iron and copper, hemoglobin formation, influence (SHERMAN, ELVEHJEM, and HART) 289
Electrolyte(s): Balance, blood serum, diet deficient in inorganic constituents, effect (SMITH and SMITH) 681
Blood serum (SMITH and SMITH) 673
Embryo: Chick, copper metabolism (MCFARLANE and MILNE) 309
—, iron metabolism (MCFARLANE and MILNE) 309
Enzyme(s): Activation (HELLERMAN and PERKINS) 241
Enzyme(s)—*continued:*
Lactate-, -pyruvate system, oxidation-reduction potentials (BARRON and HASTINGS) 567
Milk-curdling, inhibitors (TAUBER) 161
See also Arginase, Invertase, Nuclease, Oxidase, Papain, Peroxidase
Epidermis: Human, chemistry (WILKERSON) 377
Stratum corneum amino acids, human keratins, comparison (WILKERSON) 377
Ergosterol: Irradiated, antirachitic factor, tissue distribution (RUSSELL, TAYLOR, and WILCOX) 735

F

Fasting: Tissue proteins, effect (LEE and LEWIS) 649
Fat(s): Abdominal, horse (SCHUETTE, GARVIN, and SCHWOEGLER) 635
Natural, vitamin B-sparing action (EVANS, LEPKOVSKY, and MURPHY) 439
Vitamin B-sparing action, protein and vitamin G levels, influence (EVANS, LEPKOVSKY, and MURPHY) 429
— G-sparing action (EVANS, LEPKOVSKY, and MURPHY) 443
Fatty acids: Oxidation, phosphate-hydrogen peroxide system, alkaline, mechanism (WITZEMANN) 475
Phosphatides, suprarenals, beef (AULT and BROWN) 607
Folin, Otto: Obituary, preceding p. 607

Fructose: Blood, determination (ROE) 15
Urine, determination (ROE) 15

G

Glomerulus: Urine, chloride, frog and *Necturus* (WESTFALL, FINDLEY, and RICHARDS) 661
Glucose: Absorption, intestine, rate (TRIMBLE and MADDOCK) 133
Glycogen: Liver (HRUBETZ and DOTTI) 731
Gonadotropic extracts: Urine, pregnancy, tungstic acid precipitation, preparation (KATZMAN and DOISY) 513
Growth: *dl*-Cystine metabolism, dietary protein, effect (STEKOL) 641
l-Cystine metabolism, dietary protein, effect (STEKOL) 641
Essential, proteins, properties (CALDWELL and ROSE) 57
Factor, liver (KLINE, ELVEHJEM, KEENAN, and HART) 107
d-Histidine, effect (COX and BERG) 497
l-Histidine, effect (COX and BERG) 497
Isobarbituric acid metabolism, effect (CERECEDO and STEKOL) 425
Metabolism (CERECEDO and STEKOL) 425
Phenylalanine relation (WOMACK and ROSE) 449
-Promoting properties, vitamin G concentrates (BOOHER, BLODGETT, and PAGE) 599
Growth—*continued:*
Tyrosine relation (WOMACK and ROSE) 449
Guanosine: Fate, dog (CERECEDO and ALLEN) 421

H

Hair: Cystine, stone cystine, identity (LORING and DU VIGNEAUD) 267
Hemocyanin: Prosthetic group, *Limulus* (CONANT, DERSCH, and MYDANS) 755
Hemoglobin: Formation, egg yolk iron and copper, influence (SHERMAN, ELVEHJEM, and HART) 289
Hemolysin: Pneumococcal, inactivation, metal compounds, effect (SHWACHMAN, HELLERMAN, and COHEN) 257
—, —, oxidation and reduction, effect (SHWACHMAN, HELLERMAN, and COHEN) 257
Hexosemonophosphate: Muscle, disappearance (CORI and CORI) 5
Histidine: *d*-, growth effect (COX and BERG) 497
l-, growth effect (COX and BERG) 497
Horse: Abdominal fat (SCHUETTE, GARVIN, and SCHWOEGLER) 635
Hydrogen peroxide: Phosphate-, system, alkaline, fatty acid oxidation, mechanism (WITZEMANN) 475

I

Inorganic constituents: Diet deficient in, blood serum electrolyte balance, effect (SMITH and SMITH) 681

Inorganic salts: Nutrition (Smith and Smith) 681
(Light, Smith, Smith, and Anderson) 689
Invertase: Yeast, preparation (Lutz and Nelson) 169
Iodine: Determination (McCullagh) 35
Iron: Biological materials, availability (Sherman, Elvehjem, and Hart) 383
— —, determination (Klumpp) 213
Dietary, tissue cytochrome and oxidase, relation (Cohen and Elvehjem) 97
Egg yolk, hemoglobin formation, influence (Sherman, Elvehjem, and Hart) 289
Metabolism, chick embryo (McFarlane and Milne) 309
Isobarbituric acid: Metabolism, growing dog (Cerecedo and Stekol) 425

K

Keratin: Human, stratum corneum amino acids, comparison (Wilkerson) 377
Ketonic acids: α-, α-amino acids, reaction (Herbst and Engel) 505
Kidney: Phenylalanine oxidation (Bernheim and Bernheim) 275
Tyrosine oxidation (Bernheim and Bernheim) 275

L

Lactate: -Enzyme-pyruvate system, oxidation-reduction potentials (Barron and Hastings) 567
Lecithin: Electrometric titration (Jukes) 783
Limulus polyphemus: Hemocyanin, prosthetic group (Conant, Dersch, and Mydans) 755
Lipids: Liver, sex differences (Okey, Gillum, and Yokela) 207
Lipoid: -Chlorine, blood serum (Peters and Man) 23
Liver: Glycogen (Hrubetz and Dotti) 731
Growth factor (Kline, Elvehjem, Keenan, and Hart) 107
Lipids, sex differences (Okey, Gillum, and Yokela) 207
Phenylalanine oxidation (Bernheim and Bernheim) 275
Tyrosine oxidation (Bernheim and Bernheim) 275

M

Magnesium citrate: Ionization (Hastings, McLean, Eichelberger, Hall, and Da Costa) 351
Metabolism: Growth (Cerecedo and Stekol) 425
Metabolites: Oxidation (Witzemann) 475
Metal compounds: Papain activity, influence (Hellerman and Perkins) 241
Pneumococcal hemolysin inactivation, effect (Shwachman, Hellerman, and Cohen) 257

XUM

Methylene blue: Potassium determination, volumetric, with (BOLLIGER) 229

Milk: -Curdling enzymes, inhibitors (TAUBER) 161

Muscle: Activity, phospholipid, relation (BLOOR and SNIDER) 459

Hexosemonophosphate disappearance (CORI and CORI) 5

Phospholipid, activity relation (BLOOR and SNIDER) 459

N

Necturus: Urine, glomerulus, chloride (WESTFALL, FINDLEY, and RICHARDS) 661

Nuclease: Activity, *Bacillus subtilis* (MACFADYEN) 297

O

Obituary: Folin, Otto, preceding p. 607

Optical activity: *See also* Walden inversion

Oxidase: Tissue, dietary iron and copper, relation (COHEN and ELVEHJEM) 97

Oxidations: Biological (BARRON and HASTINGS) 567 (DEMEIO, KISSIN, and BARRON) 579

P

Papain: Activity, metal compounds, influence (HELLERMAN and PERKINS) 241

—, oxidation-reduction influence (HELLERMAN and PERKINS) 241

Peptides: Amino groups, free, allocation (GURIN and CLARKE) 395

Peroxidase: (BALLS and HALE) 767

Phenylalanine: Growth relation (WOMACK and ROSE) 449

Oxidation, livers and kidneys (BERNHEIM and BERNHEIM) 275

Phosphate: -Hydrogen peroxide system, alkaline, fatty acid oxidation, mechanism (WITZEMANN) 475

Phosphatides: Fatty acids, suprarenals, beef (AULT and BROWN) 607

Phospholipid: Muscle, activity, relation (BLOOR and SNIDER) 459

Phosphorus: Retention, carbon dioxide effect (FORBES) 283

Pneumococcus: Hemolysin, inactivation, metal compounds, effect (SHWACHMAN, HELLERMAN, and COHEN) 257

—, —, oxidation and reduction, effect (SHWACHMAN, HELLERMAN, and COHEN) 257

Polysaccharide: Vitreous humor (MEYER and PALMER) 629

Potassium: Determination, volumetric, with methylene blue (BOLLIGER) 229

Pregnancy: Urine, gonadotropic substances, tungstic acid precipitation, preparation (KATZMAN and DOISY) 513

Progestin: Crystalline (WINTERSTEINER and ALLEN) 321

Propionic acids: Disubstituted, nitrophenyl esters, and corresponding free acids, rota-

Propionic acids—*continued:*
tions (LEVENE, ROTHEN, and MEYER) 555
Protein(s): Amino groups, free, allocation (GURIN and CLARKE) 395
Bence-Jones, blood serum (KYDD) 747
Dietary, *l*- and *dl*-cystine metabolism, growth effect (STEKOL) 641
-Free diet, *l*- and *dl*-cystine metabolism (STEKOL) 225
Growth essential, properties (CALDWELL and ROSE) 57
Tissue, dietary cystine, effect (LEE and LEWIS) 649
—, fasting and refeeding, effect (LEE and LEWIS) 649
Vitamin B-sparing action, fat and, influence (EVANS, LEPKOVSKY, and MURPHY) 429
Purine: Metabolism (CERECEDO and ALLEN) 421
Pyruvate: Lactate-enzyme-, system, oxidation-reduction potentials (BARRON and HASTINGS) 567

R

Refeeding: Tissue proteins, effect (LEE and LEWIS) 649
Rickets: Antirachitic factor, cod liver oil, tissue distribution (RUSSELL, TAYLOR, and WILCOX) 735
— —, ergosterol, irradiated, tissue distribution (RUSSELL, TAYLOR, and WILCOX) 735
— —, fate, chicken (RUSSELL, TAYLOR, and WILCOX) 735

S

Salts: Diet poor in, body composition, effect (LIGHT, SMITH, SMITH, and ANDERSON) 689
Skin: *See also* Epidermis
Sodium hypochlorite: Chloramine-T, azochloramid, and, organic substrates, comparative action (GUITERAS and SCHMELKES) 235
Sterol: Bombicysterol (BERGMANN) 527
Secretion, coprosterol formation and (SCHOENHEIMER and SPERRY) 1
Stone: Cystine, hair cystine, identity (LORING and DU VIGNEAUD) 267
Strontium citrate: Ionization (HASTINGS, MCLEAN, EICHELBERGER, HALL, and DA COSTA) 351
Strophanthidin: Dehydrogenation (ELDERFIELD and JACOBS) 143
Strophanthin: (ELDERFIELD and JACOBS) 143
Sugars: Thio (RAYMOND) 85
Sulfur: *d*-Cystine, acetyl and formyl derivatives, oxidation, animal body (DU VIGNEAUD, LORING, and CRAFT) 519
l-Cystine, acetyl and formyl derivatives, oxidation, animal body (DU VIGNEAUD, LORING, and CRAFT) 519
Suprarenal: Phosphatides, fatty acids, beef (AULT and BROWN) 607

XUM

T

Theelin: Theelol, preparation from (CURTIS, MACCORQUODALE, THAYER, and DOISY) 191
Urine, human and mare (CURTIS, MACCORQUODALE, THAYER, and DOISY) 191
—, mare, preparation (CURTIS, MACCORQUODALE, THAYER, and DOISY) 191

Theelol: Theelin from (CURTIS, MACCORQUODALE, THAYER, and DOISY) 191

Thio sugars: (RAYMOND) 85

Tyrosine: Growth relation (WOMACK and ROSE) 449
Oxidation, livers and kidneys (BERNHEIM and BERNHEIM) 275

U

Urine: Glomerulus, chloride, frog and *Necturus* (WESTFALL, FINDLEY, and RICHARDS) 661
Pregnancy, gonadotropic extracts, tungstic acid precipitation, preparation (KATZMAN and DOISY) 513

V

Vitamin(s): A, absorption and storage, rat (BAUMANN, RIISING, and STEENBOCK) 705
—, colostrum (SEMB, BAUMANN, and STEENBOCK) 697
B-sparing action, fat, protein and vitamin G levels, influence (EVANS, LEPKOVSKY, and MURPHY) 429

Vitamin(s)—*continued:*
B-sparing action, fats, natural (EVANS, LEPKOVSKY, and MURPHY) 439
E, concentrates, stability (OLCOTT) 471
Fat-soluble (SEMB, BAUMANN, and STEENBOCK) 697 (BAUMANN, RIISING, and STEENBOCK) 705
G, concentrates, growth-promoting properties (BOOHER, BLODGETT, and PAGE) 599
—, concentration (BOOHER) 591
—, nature (BOOHER) 591
—, vitamin B-sparing action, fat and, influence (EVANS, LEPKOVSKY, and MURPHY) 429
G-sparing action, fat (EVANS, LEPKOVSKY, and MURPHY) 443

Vitreous humor: Polysaccharide (MEYER and PALMER) 629

W

Walden inversion: (LEVENE and ROTHEN) 533

X

Xylosephosphoric acids: (LEVENE and RAYMOND) 75

Y

Yeast: Invertase, preparation (LUTZ and NELSON) 109

Z

Zein: White, yellow corn, preparation (MASON and PALMER) 131
